BRISTON

This year, Briston takes a new turn and pushes the boundaries of watchmaking by proposing a Sporty extreme version of its diving watch with the Diver Pro equipped with its black matt ceramic bezel and launching a totally new product line: the Streamliner. A modern yet elegant timepiece, with its 42mm case enhanced by a 3-layer dial and driven by an automatic skeleton movement.

Edited at 500 pieces, the Clubmaster Traveler Worldtime will complete this collection dedicated to the travel and seduce the watch collectors.

Furthermore, Briston continues to offer original accessories for watches with its pure calfskin leather for Clubmaster Chic models.

Briston is still the perfect balance between a contemporary «timepiece» and a chic accessory – Casual but resolutely and deliberately accessible.

Brice Jaunet

BRISTON COLLECTIONS

The Clubmaster collection is defined by its specific shape: cambered-square. Briston offers different materials to dress this very retro-chic case shape: acetate of cellulose or stainless steel with matt, satin brushed, mirror-polished or PVD treatments on the case. The cellulose acetate is a noble material very popular in the high-end eyewear. Developed from 70% of fiber and flower of cotton, it is a natural, hypoallergenic material. Our steel case is made of premium grade 316L, corrosion-resistant stainless steel. Briston has developed several declinations of this shape.

After seven years of creations with its Clubmaster cushion line, Briston creates a totally new line with a cambered-barrel shape opening the possibilities scope and allowing all promising areas and form of expression: the Streamliner. Its smooth lines establish a new vision of watchmaking elegance, while at the same time concurring with codes of a watch inspired by Streamline style. Briston goes back in time and draws its inspiration from Streamline American style, created in the 1930's and synonymous of modern design. Modern Streamline takes root from Art deco but however stands out from it by introducing smoother and more sensual lines. With its refined design, simultaneously dynamic and fluid, the Streamliner model case was developed to provide maximum comfort around the wrist.

CLUBMASTER CLASSIC

The Clubmaster Classic was born from the marriage of shape and materials. With its “cambered square” shape which comes straight from the Roaring Twenties and lends it a unique, yet classically horological look in a standardized round watch segment, this elegant and timeless watch is made with a 40mm case that can be declined with cellulose acetate or steel.

CLUBMASTER ICONIC

Staying true to the Clubmaster's cambered square shape, Briston has revisited this classic to turn it into an elegant and timeless automatic watch.
Driven by Japanese mechanical movements with automatic winding, the new Clubmaster Iconic is presented in a three hands & open heart version or a more classic hours/minutes/seconds & date version.
Featuring a sapphire glass on top of this 40mm case, the transparent case back gives an unobstructed view of both calibres, specially equipped with "Côte de Genève" rotor & 2-part strap with easy pins system.

CLUBMASTER TRAVELER GMT

Briston launches a watch dedicated to the world of travel. With a 500 pieces special edition, the Clubmaster Traveler GMT is a fine combination of modernity and pure watch classicism. Fitted into a 42mm case design easily identifiable thanks to its two right side crowns is driven for the first time with the Swiss Sellita SW330-1 caliber. Controlled by the crown at two o'clock, the bidirectional rotating inner ring is fitted with a 24-hour plus a day/night indicator which can easily allow to its owner to read the hour of the second time zone. Frequent travelers should always be on time while wearing their Clubmaster Traveler GMT!

CLUBMASTER TRAVELER WORLDTIME

Into the continuity of the Clubmaster Traveler GMT, Briston enhances its collection of watches dedicated to the world of travel with the Clubmaster Traveler Worldtime limited at 500 pieces. In addition to the GMT complication, the second crown at 2 o'clock positioned enables the setting of the black inner bezel and to read the time simultaneously in the 24 time zones of the globe. Equipped with a fixed 24-hour ring punctuated by a day / night indication, you just have to put the city of residence opposite the number corresponding to your local time on the 24-hour ring. The GMT red or orange lacquered hand will tell you the reference time in a first time zone (that of the travel place for example), which can be read on the ring graduation.

The Clubmaster Traveler Worldtime is a timeless classic in form and function for watches collectors.

CLUBMASTER DIVER PRO

Having become emblematic, the diver's watch has established itself as the ultimate male accessory. Briston presents the Clubmaster Diver Pro: a diving watch dedicated to sports performance...

The Clubmaster Diver Pro has a robust 44 x 44 mm case resistant to a pressure of 30 bars (300 meters). The particularity of this new model lies in its beveled and notched bezel in matt black ceramic as well as in its dial, indexes and hands fitted with natural SuperLuminova© allowing a perfect reading of time in all conditions.

STREAMLINER SKELETON

The new Streamliner Skeleton is the purest combination of watchmaking excellence and love for design and beautiful objects inspired by the Streamline style. With its dynamic and fluid design, the Streamliner 42x42 mm case was developed to provide a maximum comfort around the wrist.

Crafted with new smoked acetate or in stainless steel, cut sections characterize and enhance the case curve. A particular attention is paid to steel and rose gold PVD versions as the flanks, decorated with a mirror polishing finishing, adding light and contrasting with the case body which is vertically brushed finished.

To balance with the case lines, this new model's complexity lies in its dials, composed of three superimposed layers.
Finally, the new Miyota 8N40 skeleton automatic movement with a small second at 5 o'clock sublimates the work on the dial, offering a contemporary version anchored into the DNA of this collection.

Skeleton Acetate 42 mm

SPECIFICATIONS

Smoked acetate case
Case size: 42 x 42 mm
Dial opening: 35 mm
Thickness: 11.95 mm
Crystal: Ultra-resistant sapphire glass - 2.1mm thickness

BRISTON STORE

Briston opened its first boutique in Paris in the Marais district in September 2018.

With its 1,000 points of sale worldwide, Briston finds a showcase for its collections in a 35M² space, highlighting the different watch collections of the brand, in a warm and sporty chic spirit.

A store looking alike its creator, Brice Jaunet, who in 2013 imagined the first acetate of cellulose watch... Located at 24 Rue de Poitou, the store shows the contemporary, chic and casual identity of the brand.

Come to visit us from Tuesday to Saturday
11:30 AM - 02:00 PM & 03:00- 7:30 PM
